How the bundle works together

- **Mobile Health (Initiative 2)** serves as the upstream entry point, reaching patients in the community before they reach a care crisis. Mobile health units identify patients with unmet chronic disease, post-discharge, and care coordination needs and refer them into:
- **Community Paramedicine (Initiative 3)** care pathway for in-home follow-up.
- **Remote Patient Telemonitoring (Initiative 10)** devices are deployed during Community Paramedicine home visits to enable ongoing chronic disease monitoring; alert data drives prioritized follow-up.
- **Retail Clinic Services (Initiative 12)** serve as a non-emergency referral destination for step-down care from mobile and CP encounters. All five initiatives share data infrastructure through:
- **Florida HIE/ENS Onboarding (Initiative 13)**, which provides the real-time event notification backbone for post-discharge follow-up, care coordination, and outcome documentation across the full program.
